

Realising the Social Sciences and Humanities part of the European Open Science Cloud

Main impacts

The Social Sciences and Humanities are seamlessly integrated in the **European Open Science Cloud**

Availability of an EU-wide, easy-to-use SSH Open **Marketplace**, where tools and data are openly accessible

EU-wide availability of high quality “cloud ready” **SSH tools** and high quality **SSH data**

EU-wide availability of **trusted and secure access mechanisms** for SSH data, conforming to EU legal requirements

State of the art Research Infrastructure in several pilot domains advanced through **dedicated SSH data pilots cluster projects**

Maximising reuse through **Open Science and FAIR principles** (standards, common catalogue, access control, semantic techniques, training)

As one of the five infra-EOSC cluster projects, SSHOC will seamlessly integrate its tools and services with the European Open Science Cloud

**EUROPEAN OPEN
SCIENCE CLOUD**

SSHOC pools, harmonizes and makes easily usable tools and services that allow to process, enrich, analyse and compare the vast heterogeneous collections of SSH data available across the boundaries of individual repositories or institutions in Europe.
